FOREWORD

Selected Manpower Statistics is published by the Office of the Secretary of Defense, Washington Headquarters Services, Directorate for Information Operations and Reports (WHS/DIOR). The report provides basic manpower data on active duty military, civilian, retired, and reserve military personnel of the Department of Defense (DoD). It is divided into the following sections:

- Section I - Total Department of Defense Personnel
- Section II - Active Duty Military Personnel
- Section III - Civilian Personnel
- Section IV - Other Personnel
- Section V - Reserve Personnel

Each section has a short narrative with a general description of the contents and selected highlights, displaying increases/decreases from the prior fiscal year and general trends.

Although the focus of this publication is on summary data for DoD as a whole, many tables provide associated data for the Army, Navy, Marine Corps, Air Force, and other components of DoD.

NOTE: Excluded from all total DoD strength figures are those full-time military personnel who are paid from other than active duty military personnel appropriations. This group is funded from appropriations for reserve components and Corps of Engineers civil functions.

SECTION I

Total DoD Personnel

SECTION I - Total DoD Personnel

General

Within the Department of Defense (DoD), personnel strength is considered to be the sum of active duty military and civilian personnel. (See the Glossary of Terms.) This section provides an overview of DoD manpower levels as of September 30, 1985, and presents personnel data by organizational component (Army, Navy, Air Force, etc.), location of personnel, and/or function (military or civilian). Complete data on the total number and percent distribution of active duty military and direct hire civilian DoD personnel, by state, are provided. Historical data on trends in DoD personnel strength are also provided.

Highlights

The total number of DoD civilian personnel increased by 42,200 during fiscal year (FY) 1985, 40,800 of whom were direct hires. Active duty military personnel increased by 12,800. The largest increase was in Navy personnel (6,100). The Army reported an increase of 600; the Air Force 4,400; and the Marine Corps 1,800. While the number of personnel in the Pentagon increased slightly, the average since 1974 has remained fairly constant. The total DoD manpower level increased to over 3.3 million persons, the highest since June 1975.

SECTION II

Active Duty Military Personnel

SECTION II - Active Duty Military Personnel

General

This section contains variety of data on active duty military personnel. Data are provided for FY 1985 by service, type of personnel (officers, enlisted, or officer candidates), location, and/or pay grade. Extensive historical data are provided in several areas, including trends in military personnel strength, enlistment and reenlistment trends, the age distribution, and the estimated educational levels of active duty military personnel. Other tables provide data on the number of active duty female personnel and the number of military dependents. Statistics on the number of personnel serving in, and the number of casualties resulting from major armed conflicts in which the United States has been engaged are also provided.

The particular conditions and/or limitations affecting the data in each table are explained in historical notes, as applicable.

Highlights

As of September 30, 1985, there were 2,151,032 active duty military personnel. This is an increase of 12,900 (5,600 officers and 7,300 enlisted personnel) over the FY 1984 figure. The greatest increase for officers was in pay grade O3, while the greatest increase among enlisted personnel was in pay grade E5. The percentage of officers and enlisted personnel estimated to have completed various levels of education increased in all categories. While the number of officer candidates (14,825) decreased only slightly from the FY 1984 total, it is still the third highest figure since 1954.

The number of female personnel also showed an increase (1,700 officers and 7,000 enlisted personnel). The FY 1985 total of 211,606 female personnel is exceeded only by the 1945 figure of 266,256. The number of military dependents increased by 29,900, an increase of 2,900 for the Army, 15,000 for the Navy, and 5,400 for the Marine Corps, while the Air Force increased 6,500.

The largest change in personnel by regional area was an 8,200 increase in U.S. territories and special locations, highlighted by a 3,200 decrease in Navy personnel in the Continental United States.

TABLE 2-28

DEPARTMENT OF DEFENSE HISTORICAL BACKGROUND AND NOTES

1. Officers include warrant officers, field clerks and nurses. Enlisted personnel include cadets and mishipmen from the U.S. military academies at West Point and Annapolis, as well as other officer candidates. Both officer and enlisted personnel data exclude figures on the Coast Guard.
2. Data for the year shown is as of June 30 beginning with 1878 for Army, 1900 for Navy, and 1798 for Marine Corps. For prior years the as of date is the month for which records most completely reveal the total strengths of each service. In some instances, incremental reports of different dates had to be used to compile a service total, with the result that the strength shown is not for any particular point in time during that year.
3. Army data begin with 1789, the year in which the Department of War (now Department of the Army) was established by the new U.S. Congress. Although a "regular" Army has existed continuously since that time, the total strengths cannot be documented from available records, nor can reliable estimates be made for years 1790-1793 and 1796-1800. Beginning with 1861, the data includes all military personnel on extended active duty with the Army (regulars, volunteers, militia, inductees, reserves and National Guardsmen) and U.S. Military Academy cadets. Data prior to 1861 are for regular Army and cadets only, except for 1836-1840 (Seminole Indian War) and 1846-1848 (War with Mexico). Source documents for other years do not contain adequate strength statistics on nonregular personnel called up during the War of 1812 or for short periods of service during the numerous Indian disturbances. Army data also include strengths of the Army Air Corps and predecessor agencies.
4. Navy strengths for the period 1794-1798 are estimates of the number of "on board" personnel authorized by the U.S. Congress to reestablish a Navy which had existed from 1775 to 1785 under the Continental Congress. A separate Navy Department was authorized and organized in 1798. During the early years of the Navy, crews were usually contracted for a specific sailing or mission rather than a continuous tour of duty. The strengths shown are more in the nature of an average and are, therefore, marked "estimated." Data excluded an unknown number of Naval militia, supplied by the states, who served during the War of 1812, the Mexican War, and the Spanish-American War.

5. Marine Corps strengths as shown begin in 1798, the year which the Navy Department and Marine Corps were authorized by an Act of Congress. The Marine Corps was founded in 1775 by the Continental Congress and served during the Revolutionary War, but ceased to exist in 1783. The Marines were reestablished in 1794 when Congress authorized the rebuilding of the Navy. A small number of Marines were used as guards on Navy ships. However, records do not reveal reliable strength data before 1798.

TABLE 2-30

DEPARTMENT OF DEFENSE

HISTORICAL BACKGROUND AND NOTES (P28.2)

- A. Data prior to World War I are based on incomplete records in many cases. Casualty data are confined to dead and wounded and, therefore, exclude personnel captured or missing in action who were subsequently returned to military control.
- B. Marine Corps data for World War II, the Spanish-Armerican War and prior wars represent the number of individuals wounded, whereas all other data in this column represent the total number (incidence) of wounds.
- C. Not known, but estimates range from 184,000 to 250,000.
- D. As reported by the Commissioner of Pensions in his annual report for fiscal year 1903.
- E. Authoritative statistics for the Confederate forces are not available. Estimates of the number who served range from 600,000 to 1,500,000. The final report of the Provost Marshal General, 1863-1866, indicated 133,821 Confederate deaths (74,524 battle and 59,297 other) based upon incomplete returns. In addition, an estimated 26,000 to 31,000 Confederate personnel died in Union prisons.
- F. Number serving covers the period April 21 to August 13, 1898, while dead and wounded data are for the period May 1 to August 31, 1898. Active hostilities ceased on August 13, 1898, but ratifications of the Treaty of Peace were not exchanged between the United States and Spain until April 11, 1899.
- G. Includes air service. Battle deaths and wounds not mortal include casualties suffered by American forces in northern Russia to August 25, 1919, and in Siberia to April 1, 1920. Other deaths cover the period April 1, 1917, to December 31, 1918.
- H. Includes Army air forces.

- I. Data are for the period December 1, 1941, through December 31, 1946, when hostilities were officially terminated by Presidential Proclamation, but few battle deaths or wounds not mortal were incurred after the Japanese acceptance of the Allied peace terms on August 14, 1945. Number serving from December 1, 1941, through August 31, 1945, were: Total - 14,903,213; Army - 10,420,000; Navy - 3,883,520; and Marine Corps - 599,693.
- J. Battle deaths and wounds not mortal include casualties incurred in October 1941 due to hostile action.
- K. Tentative final data based upon information available as of September 30, 1954, at which time 24 persons were still carried as missing in action.
- L. Number serving covers the period August 4, 1964, through January 27, 1973, (date of cease-fire). Wounds not mortal exclude 150,332 persons not requiring hospital care. Known status of casualties is September 30, 1985.

SECTION III

Civilian Personnel

SECTION III - CIVILIAN PERSONNEL

General

Civilian personnel statistics in this section present personnel in the following categories: direct or indirect hires; those supporting military or civil functions; and those subject to Office of Management and Budget (OMB) ceiling control and those exempt from ceilings. (See the Glossary of Terms.) Data are provided which show the worldwide distribution of both direct and indirect hires. Additional tables display the data by location of personnel (region, area, and/or country) and by organizational component (Army, Navy, Air Force, or other Defense agencies). Data on trends in annual accession and separation rates are also provided.

Highlights

The total Department of Defense (DoD) civilian workforce supporting military functions and subject to OMB ceiling increased by 40,160 in FY 1985. The number of direct hire civilian personnel increased by 38,750, while the number of indirect hires increased by 1,408, all of whom were foreign nationals. Among the Military Departments, the Army reported the largest increase in civilian personnel (16,700), followed by the Navy (10,700).

SECTION IV

Other Personnel

SECTION IV - OTHER PERSONNEL

General

This section contains data pertaining to retired military annuitants and to dependents of both active duty military and civilian Department of Defense (DoD) personnel. Data are provided on the geographic distribution of dependents by region and country and on trends in military retirements. (Data on the geographic distribution of dependents living in Alaska, Hawaii, and the U.S. territories exclude dependents of U.S. citizen civilian employees who are permanent residents of these areas and who are employed in the state or territory of their residence.)

Highlights

The total number of dependents of military and civilian DoD employees increased by 33,200. This reflects an increase of 2,100 for the Army, 19,400 for the Navy, 5,400 for the Marine Corps, and 6,100 for the Air Force. The majority of this increase is located within the Continental United States. The number of dependents accompanying military and civilian employees at overseas locations in foreign countries increased by 13,400.

The actual number of military annuitants (1,479,940) was the highest level ever recorded. This represented a 30,800 increase from the previous year. The total number of nondisability annuitants and the number of families receiving survivor benefits also reached their highest recorded level.
